WORK EXPERIENCES - 7 years 10 months

2021 Oct to Present - Senior System and Business Analyst | Sparklingtide

Many projects at Sparklingtide are aimed to develop an MVP. This leads to a fast development process in conditions of great uncertainty. In this situation documenting requirements could become a bottleneck.

To mitigate this risk I offered a documentation approach that will be easy to navigate, be more understandable to the team and be transparent about available requirements detailization.

2021 May to 2021 Oct - Senior System Analyst | Hice Bank

Hice Bank is a startup company with mobile banking service. I was the only analyst in Backend team and beside writing requirements for new features my goal was to implement new documentation approach that allows to write an extensive documentation within context of existing processes with minimal effort.

2019 Aug to 2021 Apr - Product Owner | Sberbank

I was invited as an analyst with expertise in Oracle Siebel CRM, yet after 2 months I was promoted to Product Owner. My goals were to implement new features that would support rapidly changing business processes and make them correspond with policy of global migration to microservice architecture. Major challenges were:

- Leading a full project team
- Neccesity to find a correct architectural solution in a short time.

2017 Dec to 2019 Aug - Senior System Analyst | GetCRM

At GetCRM I used my expertise in Oracle Siebel CRM to implement a loyalty program for Tatneft oil company.

2013 Nov to 2017 May - System Analyst | At-Consulting

Career start in IT. I started as a QA Engineer then soon became a team lead of QA on a project and half a year after employment I started working as an Analyst.

LEARNING EXPERIENCES

2008 to 2012 - Bachelor | Russian Presidential Academy of National Economy and Public Administration, Moscow

Business informatics
