OBJECTIVE

Principal Engineer with 12+ years across startups and large tech, including CTO role. Specializing in AI-agent systems, event-driven microservices, and system integrations, with production experience across backend, frontend, and cloud infrastructure.

Seeking Principal AI Engineer or Principal Software Engineer role building AI-enabled products — hands-on depth in AI engineering (agents, RAG, evals), backend architecture, and full-stack delivery.

SKILLS

Languages	Python, Golang, SQL, Typescript/Javascript
Technical Skills	System Integrations, Backend Architecture, DevOps, Cloud Infrastructure, CI/CD
AI Development	Agentic systems, Harnesses, Context & RAG systems, Loops & Graph Engineering
Technologies	Kafka, RabbitMQ, PostgreSQL, ClickHouse, Turbopuffer, ChromaDB, Redis, AioHTTP, Vite, Hono
Tools	AWS Cloud, Docker, Kubernetes, Terraform, Supabase, Vercel, Hetzner
Domains	AI-agents, GeoSpatial systems, Financial Services

EXPERIENCE

Founding Engineer	Dec 2025 – Aug 2026
Fleetcraft	London, United Kingdom

- Core engineer on an AI copilot for aviation MRO, cutting shop-floor admin time by 75%.
- Built AI agents with custom tools and RAG, reaching 98% first-pass acceptance of AI-generated maintenance paperwork.
- Implemented document intelligence pipeline: OCR, chunking, and vector indexing of regulatory PDFs (TurboPuffer).
- Established LLM evaluation practice: eval suites and end-to-end agent tracing (Arize, PostHog, OpenTelemetry).
- Built bidirectional ERP integration syncing compliance records, parts catalogs, and billing data.
- Delivered product verticals end-to-end across FastAPI/PostgreSQL, React/Typescript, and an embedded browser extension.
- Owned security hardening (session freshness, token rotation, security headers) supporting SOC 2 Type 1 compliance.

CTO (Tech Lead & Principal engineer)	Feb 2023 – Dec 2025
Aino.World	Dover, DE, United States

- Built a product that attracted 300K+ users.
- Built a team of 5 developers, responsible for recruiting, training, and cultivating a highly motivated and talented engineering staff.
- Led delivery of an industry-first geospatial AI assistant supporting advanced analytical operations.
- Developed Scalable SaaS Architecture based on event-driven architecture, using Kubernetes and RabbitMQ.
- Built scalable DevOps and Cloud IT infrastructure from scratch to ensure reliability, scalability, and security.
- Passed several technical due diligence processes, securing a successful investment round.
- Build integrations with external data sources, like Open Street Map and Overture, using Specialized API's and Amazon Athena.

Product Owner

SD Technologies

Sep 2022 – Feb 2023
San Diego, CA, United States

- Managed a team delivering compliance system integrations including medical goods tracking and KYC.
- Ensured solutions adhered to regulatory standards and integrated reliably with existing systems.

Senior System Analyst

Sparklingtide

Oct 2021 – May 2022

Moscow, Russia

- Coordinated blockchain oracles and web3 client; designed data synchronization between blockchain and centralized services.
- Delivered a solution for a new cross-functional collaborative platform that includes cross-integrated email service, online chat, canvas board, calendar, and document storage.

Senior Analyst & Developer

Hice Bank

May 2021 – Oct 2021

Moscow, Russia

- Served as the sole backend analyst; introduced a documentation approach embedded in existing processes.
- Developed Python-based microservices, aligning analysis with implementation for faster delivery.

Product Owner

Sberbank

Aug 2019 – Mar 2021
Moscow, Russian Federation

- Delivered features to support rapidly changing business processes during migration to microservices.
- Led a cross-functional team and made time-sensitive architectural decisions.

System Analyst

GetCRM Development

Dec 2017 – Aug 2019
Moscow, Russian Federation

- Implemented a loyalty program for Tatneft to increase customer retention and their LTV.

Senior Analyst

AT Consulting

Nov 2013 – Apr 2017
Moscow, Russian Federation

- Implemented loyalty program to increase average check.
- Worked on banking CRM to speed up process of business credit application review.

EDUCATION

Bachelor's degree, Business Analytics, The Russian Presidential Academy of National Economy and Public Administration (RANEPA) 2008 – 2012
